a truly special book of questions and answers for every day of the year learn something new and exciting every single day on various topics like the universe our earth plants and animals science and technology human body and more 365 fascinating questions answered in these pages this beautifully illustrated book reveals the mysteries of a whole world of wonders a must have for curious young minds

the design and functioning of an information system improve to the extent that the system can handle the questions people ask surprisingly however researchers in the cognitive computer and information sciences have not thoroughly examined the multitude of relationships between information systems and questions both question asking and answering the purpose of this book is to explicitly examine these relationships chapter contributors believe that questions play a central role in the analysis design and use of different kinds of natural or artificial information systems such as human cognition social interaction communication networks and intelligent tutoring systems their efforts show that data structures and representations need to be organized around the questioning mechanisms in order to achieve a quick retrieval of relevant useful information

research powers innovation and technoscientific advance but it is due for a rethink one consistent with its deeply holistic nature requiring deeply human nurturing research is a deeply human endeavor that must be nurtured to achieve its full potential as with tending a garden care must be taken to organize plant feed and weed—and the manner in which this nurturing is done must be consistent with the nature of what is being nurtured in the genesis of technoscientific revolutions venkatesh narayanamurti and jeffrey tsao propose a new and holistic system a rethinking of the nature and nurturing of research they share lessons from their vast research experience in the physical sciences and engineering as well as from perspectives drawn from the history and philosophy of science and technology research policy and management and the evolutionary biological complexity physical and economic sciences narayanamurti and tsao argue that research is a recursive reciprocal process at many levels between science and technology between questions and answer finding and between the consolidation and challenging of conventional wisdom these fundamental aspects of the nature of research should be reflected in how it is nurtured to that end narayanamurti and tsao propose aligning organization funding and governance with research embracing a culture of holistic technoscientific exploration and instructing people with care and accountability

talk about god is often the source of controversy theists and atheists are equally passionate when making their stand for or against belief in god in this book a wide range of philosophers of religion have come together to discuss how serious talk about god ought to be conducted for theists and atheists alike in what should be their common pursuit for truth the essays both address methodological questions and provide a range of concrete samples of serious god talk spanning from political religion and classical proofs of god's existence to the problem of evil series nordic studies in theology nordische studien zur atheism vol 4 subject religious studies Å Å Å Å
